

LLDP Stretch Wrap Film

Specifications

Stretch Wrap Film provides protection from moisture, UV radiation and dust. It unitizes the loads for easier handling.

a professionally managed company. We manufacture & market as well as import the complete line of Packaging Products and their Machineries. We have over 2 decades experience and are committed to BEST Quality products using the latest technology at most competitive prices.

With innovation as our major forte, we have been successfully, catering the varying needs of diverse industries including food, pharmaceuticals, chemical, cosmetics, paper, stone, engineering and Steel etc. Our State-of-the-art manufacturing unit equipped with the most advanced machinery enables us to meet bulk as well as immediate requirements of our clients. Our competent engineer's expertise in conceptualizing the idea of our clients and offer them best available solutions for their specific needs.

With Head office located at **Mumbai**. Being a customer centric organization, we provide our clients with timely delivery of the goods and excellent after sales service

Stretch Wrap Film can also be customized stretch ability, puncture resistance and transparency. It has thickness from 15-microns to 60 microns and width from 50-mm to 2000-mm which reduces total cost and running expenses

Stretch wrap is primarily used for weather proofing cartons by binding shipping cartons to pallets before dispatching it.

We offer both hand wrap and machine wrap rolls in 1", 3" and 6" spool size. Our films can be customized to various thickness, size and stretch percentage.

Properties -

1. Superior cling
2. Outstanding puncture and tear resistance.
3. High load containment value.
4. Optical clarity for electronic scanning.
5. Reduced noise
6. Resistance to abrasion and shock

APPLICATIONS
